

FRONT[®]

Formerly
StoneCycling

We are FRONT®

Curious people seeking new worlds, new materials, and new technologies across the dimensions of space and time.

— Fueled by the fact that change is needed, we cross borders and explore uncharted territories. On our adventures we find new FRONT materials,

and one by one, they become part of our mission.

— — At FRONT, we work hard to develop the next generation of aesthetic, sustainable materials. —

Where the circular economy thrives.

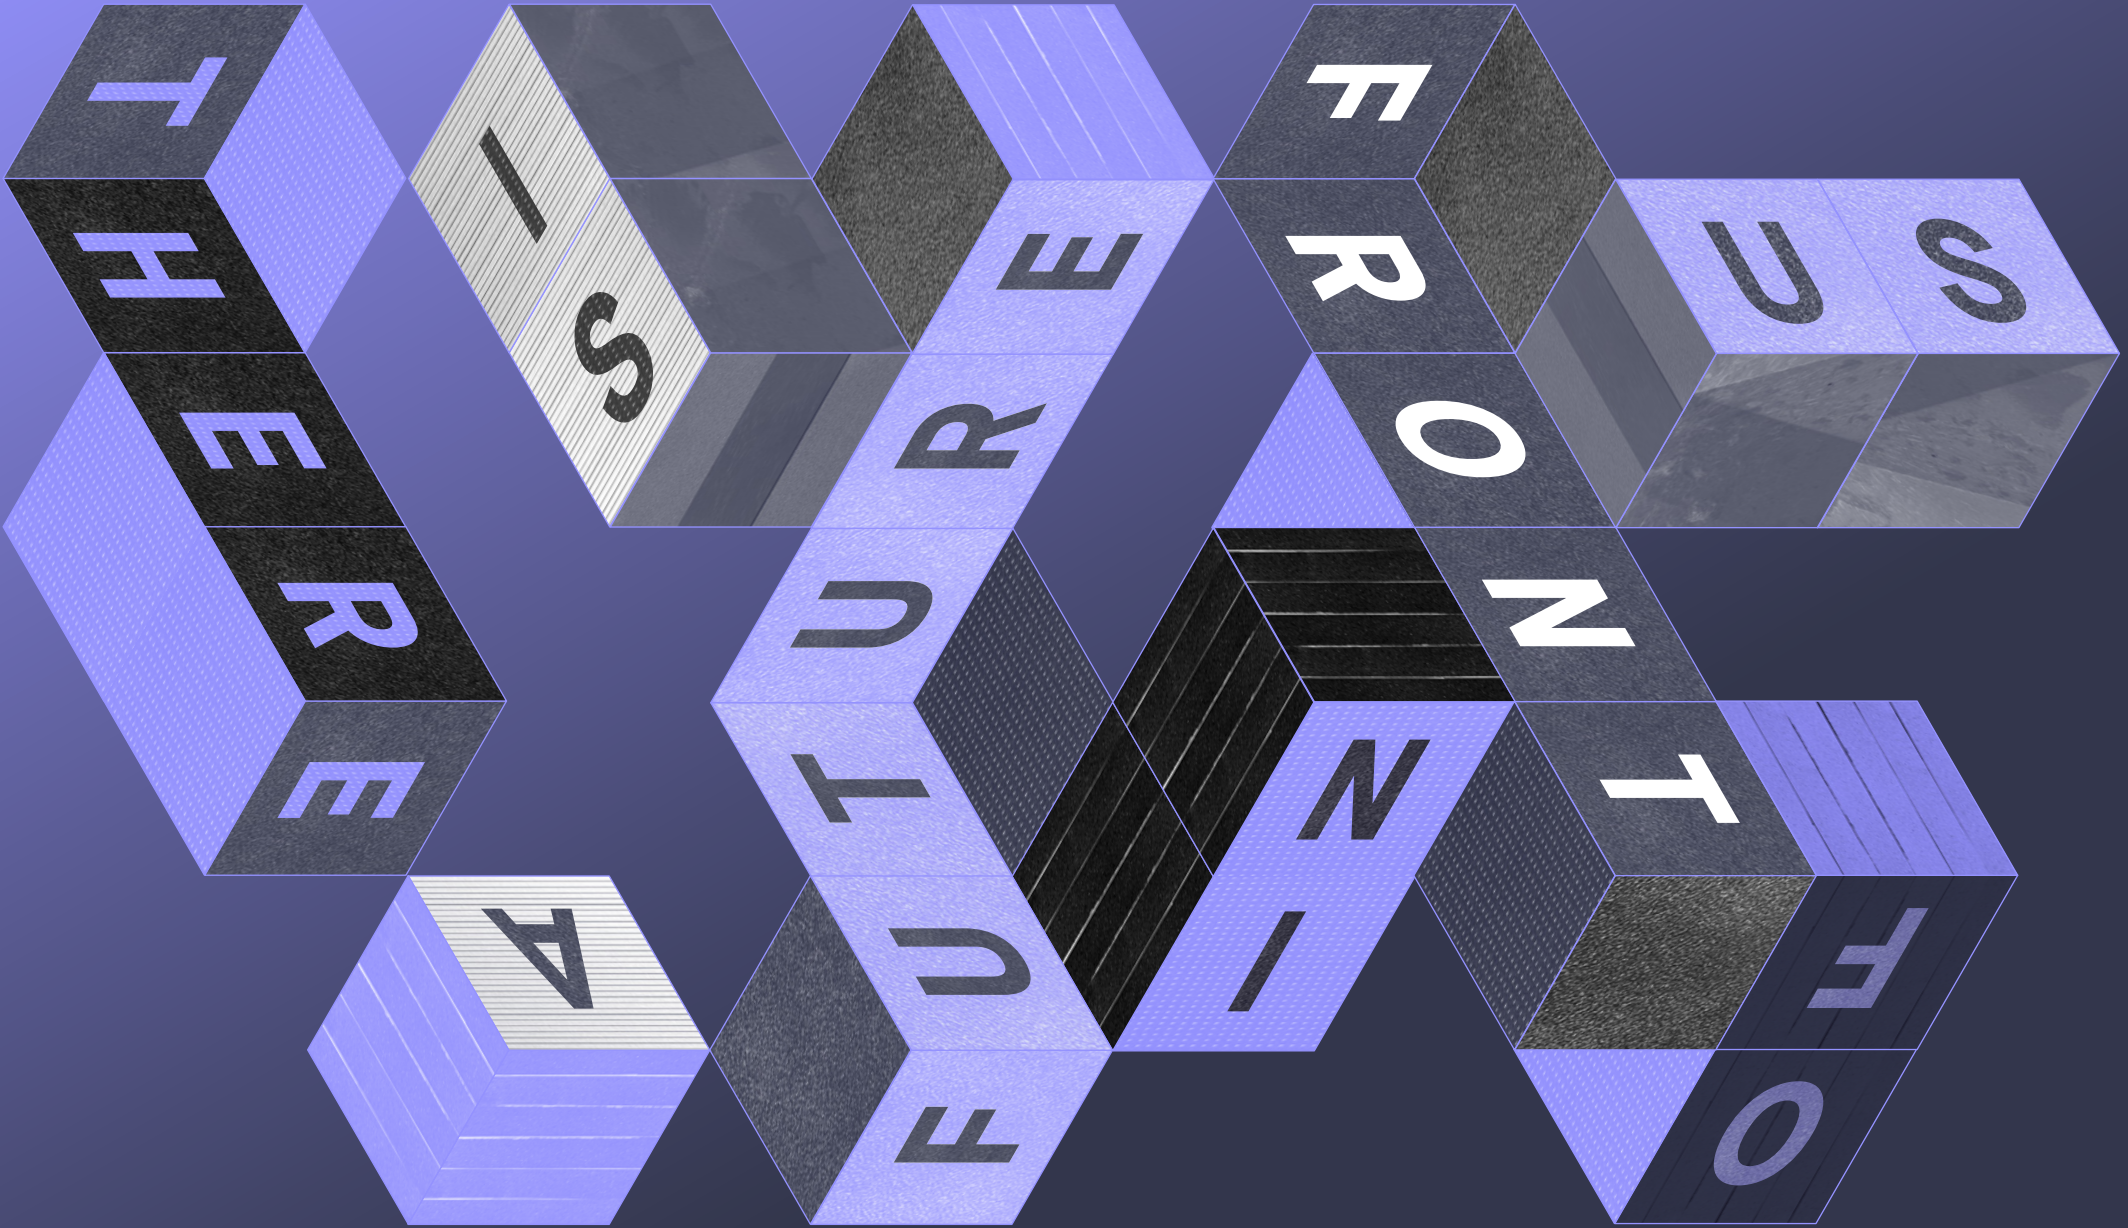

Where surfaces evolve and adapt.

Where bold ideas shape our world.

Where aesthetics and durability converge.

Where all concrete is growing from bacteria.

Where we need you in FRONTI

Where partnerships build the future.

Where waste transforms into opportunity.

Where purpose transcends profit.

Where nature guides our designs.

Where every decision contributes to sustainable progress.

Where collaboration ignites innovation.

What we do at FRONT®

When everything is new, you can be sure nothing will be certain. To cope with this, we are agile, quick on our feet, and focused on solutions. Knowing the standard is rarely the perfect solution, we help you find what truly works best for you.

1

We sell

At FRONT, you have access to cutting-edge sustainable building materials for every visible area in, on, and around your building. We bring building materials to the market that matter. Collaborating with innovators worldwide, our collection expands rapidly, enhancing your next project.

Where do you want to
apply FRONT materials?

2

We advise

A new benchmark for sustainable construction is needed. We want to create this together with you. We share our knowledge through keynotes, articles, and interactive sessions like lunch and learns. We invite you to do the same. Together we can advance this much-needed transition.

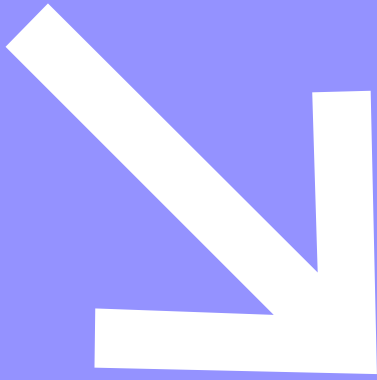

**Need help specifying
a FRONT material?**

3

We innovate

With over a decade of experience in creating and scaling innovative materials, we carefully scout and select start-ups and scale-ups facing similar challenges. Together we accelerate their growth and bring these materials faster and more effectively to the market - for you to use.

**Which FRONT material do you want
to see added to our collection?**
